

# CABIN SERVICE TRAINERS

## EDM, A GLOBAL SUPPLIER OF CABIN CREW TRAINING SIMULATORS, DESIGN AND MANUFACTURE CABIN SERVICE TRAINERS FOR ALL AIRCRAFT TYPES.

EDM's Cabin Service Trainers (CSTs) can be mocked up with a full or partial width fuselage and equipped to accurately represent the customer's specific aircraft LOPA (Layout Of Passenger Accommodation). Fully functional lavatories, galleys, mood lighting and other features can be provided to recreate the aircraft cabin environment.

Our high quality simulated cabin interiors can be fitted with a choice of economy, business and first class seating, cabin attendant seats and fully functional attendant control panels.

Our CSTs help cabin crew fully understand the passenger cabin layout and cabin systems by familiarising them with cabin lighting, call lights, communications system and interphone system operation.

This highly realistic training environment is ideal for training crew in the etiquette of first, business and economy class service, along with correct cabin service management.

### KEY FEATURES OF EDM'S CSTs
